### Leeuwarden Zuiderburen

Zuiderburen is located to the south of Leeuwarden, on the other side of the Van Harinx canal. The plan will realize around 1,900 houses as tasked by the Vinex plan. The residential program is subdivided into three neighborhoods. Other program elements include planting new woods and digging a number of large water areas. The existing twin village of Hempens-Teerns forms the pivot-point in a landscape composition that is carefully rooted in its environment and is directed towards the vast Frisian landscape.
